

**Giantsbane Games.** For the new game “Tactics of Prophecy”. They are looking for programmers and 2D artists.

We at Giantsbane Games are looking for new talent to join our team for the development of our new game “Tactics of Prophecy”. More specifically we are looking for programmers and 2D artists.

Tactics of Prophecy is an “Auto-chess” mobile game and very inspired by the successful “Team fight Tactics” & “Super Auto Pets” games.

For this summer of 2025 we are happy to welcome 1-3 programmers who’s interested in deepening their (preferably already existent) skills in the Godot game engine and:

- Implement core mechanics related to an “Auto-chess” game.
- Implement scaling UI for various resolutions.
- Set up the initial online multiplayer & account creation/hosting.
- Develop the behavior (AI) of non-player opponent teams.

We are also looking for 1-2 enthusiastic 2D artist who’d enjoy:

- Drawing various fantasy creatures and characters.
- Animate or draw poses for these characters actions such as attacks & movement.

You will receive an onboarding of the game project by the Game Director, Tor H, and you will have a team lead available for onboarding & mentorship within your area of work, where Max V is lead programmer & Therese O is 2D art lead.

Our office is located at Campus Skellefteå, in the J-house building together with Arctic Game & other local game studios such as Gumlin Games & Metropolis.

We prefer working together on-site at the office, and you will be provided with a workstation, PC & endless cups of coffee provided by Skellefteå Science City.

We give no promises, but for the right person there exists a possibility to join the team long-term even after the summer as we are hoping to expand the team in the near future.

Thanks for reading this, we look forward to your application!

For further questions about Giantsbane Games or the game project “Tactics of Prophecy”, feel free to visit us at the office, or reach out to Tor H on:
